Professional Experience

PT. Minilemon Nusantara
- **Internship in Backend Developer**   **January 2025 - Now**
  - Key Duty :
    - Develop and maintain the backend infrastructure using NestJS, Prisma, and PostgreSQL, overseeing the management and optimization of database flow. Collaborate with the team on system architecture and data handling processes, utilizing Git for version control, Huly for project management, and DBDiagram for visualizing database structures to ensure alignment and efficiency in development.

PT. Gunung Raja Paksi (GRP) - Bekasi, Jawa Barat
- **Internship in Supply Chain Management**   **March 2022 - July 2022**
  - Key Duty :
    - Managing the Supply Chain, specifically checking item availability, and updating item quantity.
    - Making Daily Reports for Supply Chain Management team to observe parts that need improvements
- **Internship in Enterprise Resource Management Analyst**   **December 2021 - February 2022**
  - Key Duty :
    - After completing SAP training provided by the company, as interns, we train production employees in SAP product management.
    - Achieving optimum skills for each employee to implement and use SAP product management.
    - After specified employees are given the optimum skills, interns are directed to manage SAP Production, specifically checking weight bridge and data errors.

Technical Skills

- JavaScript
- TypeScript
- MySQL
- Java
- PostgreSQL
- NoSQL

Mastered Tools and Framework

- Visual Studio Code
- NestJs
- NextJs
- Prisma ORM
- ExpressJs
- Spring Boot
- Supabase
- Postman
- Docker
- GitHub
- Huly
- MongoDB

Education and Courses

- **President University**   **Bekasi, Jawa Barat**
  - Bachelor's Degree in Informatics - 3.07 / 4.00
  - Courses :
    - Programming Concept (C), Web Programming (HTML-CSS), Structured Programming (C++), Object-Oriented Programming, Client-Side Internet Programming (JavaScript), Server-Side Internet Programming (PHP), Database Management Systems, 2D and 3D Computer Graphic and Animation.

- Purwadhika Fullstack Web Development [Bootcamp]

Projects

- Event Booking System (Typescript)
  - A Website Application where a user can book a ticket for an event, I am implementing :
    - Front-end : NextJs, Axios, Yup, Zustand, Formik, Tailwind
    - Back-end : ExpressJs, Prisma, jsonwebtoken (JWT), Bcrypt, CORS
- Simple Authentication Authorization (Typescript)
  - A Website Application where I am implementing basic authentication and authorization features. It leverages TypeScript for development and showcases a simple flow for user login and access control. The application demonstrates server-side authentication practices and role-based access to different parts of the app.
